OBJECTIVES

Develop technical activities and collaborate with the growth of the company.

SUMMARY OF QUALIFICATIONS

Graduated in Computer Science from the State University of Maringá, I'm currently doing a graduate degree in Data Science;

In my free time I study the Flutter framework, I have experience with Linux distributions and versioning with Git;

In Flutter I have experience with instagram UI clone, food app with Getx and payment per PIX, a ToDo list with Provider and modular architecture;

I have experience in Python with simulations of robots, a project from my final course, in which I created a opensource library for mobile robot localization.

In Python I used the Pandas library to perform data exploration with DataFrames and the Seaborn library for data visualization.

EDUCATION

STATE UNIVERSITY OF MARINGÁ
Computer Science

start: 2016/04 - end: 2022/06
Maringá, Paraná

EXPERIENCE

SENAI ARTIFICIAL INTELLIGENCE HUB

start: 2022/09 - end: 2023/09

Resident

Business understanding & how artificial intelligence can be applied to industry.

Cases:

- Natural language problems (classification and similarity)
- Computer vision models (GANs and classification)
- Data visualization (Dash)

Londrina, Paraná

SKILLS

**PROGRAMMING LANGUAGES
FRAMEWORKS & TOOLS
LANGUAGES**

Experienced: Dart | Python | C

Flutter | Pandas | Git | MySQL | Linux | NodeJs | Clean Code | Scrum

Intermediário: Inglês

Familiar: Javascript | SQL | Shell Script | Latex

EXTRA CURRICULAR ACTIVITIES

DART WEEK 6ª EDITION

Rodrigo Rahman

5-day online event creating a Flutter app with PIX integration;

2022/02

DART WEEK 7ª EDITION

2022/06

Rodrigo Rahman

5-day online event creating a Flutter app with Bloc and Cubit;

ACADEMIA DO FLUTTER 2.0

2022/02 - Studying

Rodrigo Rahman

Complete course on Flutter frontend, backend, design patterns, state management and API consumption.
